

BIOLOGY

The Oxford University Press Biology list was recently ranked by the Book Marketing Society as the number one organismal biology list in the UK. The scope and content of the list can be described in general terms as "Ecology and Evolution", with a particular reputation for quality in the fields of evolutionary biology and epidemiology. As well as maintaining these strengths, the list continues to expand in the fields of ecology, conservation biology, physiology, animal biology, marine biology and plant science. The list is aimed at a market largely comprised of graduate students and academic professionals.
